Expand your sewing, quilting, and embroidery creativity, and fill your life with personality.

Experience the Difference 

Discover Your Creative Options The Limited Edition *artista 635*

Start/Stop Button & Speed Control
Start or stop the machine with the touch of a button that is located above the needle area. The slide speed control allows the user to manage the max/min speeds of the machine, which comes in handy when mastering a new technique.

Large, Color Touch Screen
Everything you need to know is displayed in full color and located in the center of the machine – right where you need it.

Separate Winder Motor
Save time without interrupting your sewing. With the separate motor, you can wind bobbins while sewing or embroidering, and adjust the winding speed for delicate or stretchy threads.

Multifunction Knobs
With the quick turn of a knob you can accurately adjust stitch length and width, and control the size, placement, and rotation of the optional embroidery designs.

Infinitely Adjustable Presser Foot Pressure
Easily control the presser foot pressure to optimize the even fabric feed, helping you achieve the perfect seam with any fabric, from delicate to thick.

Cool Fluorescent Light
With BERNINA's built-in CFL you can illuminate the sewing area around your needle with bright-as-day, shadow-free light.

BERNINA Stitch Regulator (optional)
The first of its kind, the BSR makes free motion quilting easy by ensuring uniform stitch length even at variable sewing speeds. It can also sew zigzag stitches for optimum creativity.

Built-in Design Library
The extensive Design Library includes 80 beautiful designs and 5 fonts so you can create stunning embroidery compositions.

Embroidery Module (optional)
Gain access to embroidery designs and alphabets included with the embroidery module. Use its many functions to edit and combine embroidery designs.

Stitch Animation
Easily follow your sewing progress stitch by stitch on the large color touch screen. Helpful start and stop reference points are also indicated.

USB Interface & BERNINA USB Memory Stick (optional)
Use the USB interface to expand your embroidery library. You can even transfer designs using the optional USB memory stick. Download free ArtLink software at www.bernausa.com.

Free Hand System
Unique to BERNINA, the FHS raises and lowers the presser foot while releasing thread tension and lowering the feed-dogs, leaving your hands free to guide your project.

artista 635 with optional embroidery module

The *artista 635* comes with a variety of decorative stitches and sewing alphabets for all your creative projects. Total stitch control lets you adjust stitch length, width, and needle position. Plus, you can unlock embroidery designs with the optional embroidery module. The large color touch screen is incredibly intuitive, and the Free Hand System allows both of your hands to guide your project to perfection.
