

## High Speed Straight Stitch Machine PQ-1500s

- High-speed straight stitch machine with a maximum 1,500 stitches per minute.
- Heavy duty construction for increased stability.
- Pin feed mechanism for precise fabric management... even velvets.
- Telescoping built-in thread stand for cone thread usage.
- Automatic thread cutter/F.A.S.T. needle threader provides time saving convenience.
- Fabric separator for perfect handling of difficult to join fabrics.
- Needle stops at lowered position for easy fabric rotation with the touch of a button, quickly returns to the needle up position when needed.

- Expanded work area for large projects. More height and width in the fabric bed area.
- Up to 7mm stitch length for perfect stitch lengths or basting.
- Knee lifter and bed extension table for quilting and fabric management of bulky projects.
- Full range foot pressure adjustment and 4 feed dog settings for maximum fabric control.
- Thread tension adjustment dial for greater thread tension control.
- Automatic thread cutter saves time.

### F.A.S.T. NEEDLE THREADER

Fast and simple threading says it all! Saves time and your eyesight, by automatically feeding the thread through the needle's eye. Enjoy the convenience of household needles.

### PRECISION PIN FEEDING SYSTEM

It's easy to sew a wide variety of fabric thicknesses thanks to Brother's Pin Feed system for precision fabric feeding. The unique fabric separator feature joins lightweight linings to materials such as velvets and eliminates the puckering. The PQ1500S introduces an easy to use foot lift operation-the feed pin drops automatically when the presser foot is lifted.

### DROP FEED

The feed dog adjustment knob lowers the feed dogs below the fabric plate for free motion sewing.

### BOBBIN CASE COVER

The side cover makes care and maintenance around the bobbin case a breeze. Simply lift the side plate to open the bobbin case cover. Convenient for cleaning dust and thread in the needle plate area and changing bobbins.

### THREAD TENSION

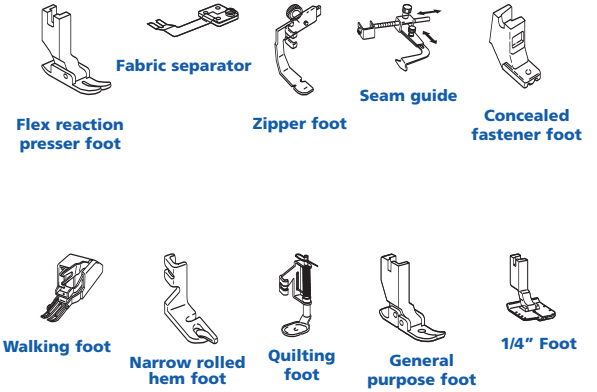

Achieve accurate tension control with the convenient thread tension dial.

### AUTOMATIC NEEDLE-LOWERING MECHANISM

This convenient feature lets you pre-program the needle up/down position when the machine stops. Eliminates the need to rotate the balance wheel to lower the needle before rotating fabric, during a continuous stop and start sewing operation.
